

# Steatite Terminal Blocks

IPS Ceramics introduces its new range of steatite terminal blocks. The blocks offer excellent high temperature resistance, making them ideal for safety-critical applications such as emergency power supplies & lighting systems.

- Multi-terminal blocks are much quicker to install than individual rail mounted terminals – and provide a tidy solution!
- Fire tested to  $>840^{\circ}\text{C}$  ( $>1540^{\circ}\text{F}$ )
- 8-way and 12-way blocks as standard, with custom-made sizes also available
- Unglazed versions available
